Keep Oped House-What Was Done in San Francisco and Elsewhere.

Measuragen, Jan. 1 .- The new year began with a cold disagrecable him, which continued throughout the day. The White house was, as usual, the centrifue of interest. No one of its predecessors exceeded in brilliarly the first official freeption given by the head of the present administration. Certainly never before has there been at the White house a reception with such a arge and distinguished representation from other nations. This was due principally, in addition to the regular diplomatic and consular o'lloors, to the delogates to the laternational maria pand

big delogates to the International martin and Ran-American conferences. The Interior defeorations, while not emborate, were very effective, emissiving of a 1 beard distribution of tropical and lowering plants and cut flowers. The reception was held in the blue parior from It till 2. The recepting party entered the parior in the following order: President Harrison and Mrs. Notee, Vice-President Harrison and Mrs. Notee, Vice-President and Mrs. S. L. At 12 o'clock some 200 young men and ladies assembled in the gymnestum hall, when, after singing and a sole by Professor Werschkull, an address was delicered by Kev. Dr. Brown, of the First Presbyterian church, His subject was Father Time. Mr. Brown spoke of the past year, its wonderful record and lesson; the pranks of boyhood and college days were reviewed, and an illustration diawn from the life of Thompson, the author, who, in his early years, wrote novels of the "blood and thunder" style, but who afterwards regarded with corror his early mistake and became extremely sensitive on the matter. He had to suffer for his inistake, for a sival published whathe had tried to keep secret. So, fabrigh young men may saw wild outs, they also will reap the fruits of their early indispretions. Time accomplisher great things. The great problem at the close of the war was how irlendscaip was to be restored. Time has done it. Sorrows and severe afflictions are assuaged by time. Time is priceless; an averge man's lifetine gives but about seven or eight years in which to mould character and fulfill—the design of the Creator. Time wasted cannot be restored, enreless and Lad habits, ill-spen Sundays use up the few hours we have for solf-improvement. Space hours are often hours or feen twistered, enreless not strongthened by self-improvement, Space hours are often hours or temptation. There as here.

The address of which the above is a synopsis was an eloquent appeal to young men to value present moments and make the nost of opportunities, it was entiremed by bright points and with an eloquent and will long be remembered by those privileged to hear it.

From 1 to 5 o'clock an elegant lunch was apread by the hadies of the anxiliary, assigned by ladies of the churches, to which the young men, who were constantly calling, did any lot justice. About 4 o'clock Messra, Porter and Conley, of the Jinglers company, added to the attractions of the alingers company, added to the attractions of the firm noon by singing some of their selections. Over 600 young men coiled during the day. In the conting at 8 o'clock an excellent programme was rendered by some of the best local ration. Mr Blane Shiws That England Is for Free Trade in Macrescotares a d for Proting ton of British Beamers

The W York, Jan. 1—[Special Telegram ?—The Trib me prints extracts from the "see raise and protte ion discussion between Mr. G adstors and Mr. Bearts which discussion alls between for rand fifty pages of the Aor's survivous ferrers. Gar's one in his paper says. I want to sak whether the wages of the agricultural half are relised by the existence of projective Laws which cover the artisen half. This you cannot possibly affirm because it is an elementary fact that the wages of labor as are governed by the prices of the commodities they produce, and that the optices are free trade prices. You have free trade tollers all over foot country, and by their side you have protected artisans.

irade toilers all over your country, and by their aide you have protected actusons. I ask the next question is the remuneration of free trade to ters all things taken into account equivariant to that of the prote ted missans? If it is not, why do not agreultural men go where there is demand for manufacturing and mining later and by augmenting the upply reduce and equalize the rate? Which is like asking his comes it a man is content with one lost when two were offered him. The snawer would be also not content whenever he can take the two and leaves the one. Best Investment on the Market

A careful investigation of the situation which exists on Bellingham Bay to-day will convince any shrewd man of affairs that the foundation of a great city has been laid at Fairhaven and that the work to that end has begun in carnest. Natural resources (coal, iron, lumber and agriculture) are there in inexhansitible quantities; it has an incomparable harber; great miles are building; rows of brick buildings, including a magnificent, hotel, are being erected; miles of streets are being graded and sidewalks loid; now industries are sorthering up and new lines of business are being opened every day. Shipping is increasing every hour. People are flocking there by the thousands and the tributary country is settling with a phenomenal rapidity. Fairhaven has two railroads building in different directions. The town is, moreover, backed up by a powerful land company that is nursing, building and developing it on liberalland broad gauge princip es. Any sagactous porson, who will caimly look the situation over, can not fail to recognize the fact that the history of Tacoma is to be repeated at Fairhaven.

EAST FAIRHAVEN ADDITION is less than a mile back of the town and commands, a beautiful view of the town and bay. Streets are 80 and 100 feet wide and correspond with the streets of Fairhaven. Denovan avenue, 85 feet wide, is being improved its entire distance, from Fairhaven through East Fairhayen, and planked, and will be the main thoroughfare from Happy Valley and the caviliance distance. Valley and the outlying additions.

Prices of lots, \$125 for inside, and \$150 for corners, one-third cash.

WOODSTOCK. The finest, most choice and sightly addition to Portland. without a peer. We want all to investigate, and take pleasure in showing its merits. There is no property in the neighborhood of Portland at such prices that have surety of connection by Electric Street Railway to the center of Portland. We make no assertions that are not facts, and investigation will satisfy you. To those in want of acre tracts for homes, or to subdivide, we have them in Woodstock. No loss of ground in cutting streets, but every foot utilized. We believe it the best, and will be pleased to try and convince the skeptical.

TELFER & STEARNS REAL ESTATE 30., 88 STARK STREET.

France's Addition to Aberdeen

· WILL BE PUT ON SALE.

This choice property lies within five blocks of the present business center and in offering it to the public we do so feeling that we can invite with confidence, the attention of investors. This addition is not on the outskirts of an imaginary town, but is in the heart of a thriving city of 2000 inhabitures with a monthly pay roll of \$30,000, situated on one of the hest harbors of the Pacific coast. The land on all sides of this addition has been platted and sold and we believe we are offering a legitimate business investment with a certainty of large profit. Prices from \$100 to \$300 per lot. Terms one-third cash, one-third is nine months, one-third in twelve months. Title perfect. Call or address the owners—

THE PRESIDENT FAVORS IT.

It is the general expectation in Washing-It is the general expectation in visually in that, very soon after the reassent ling of largress, the president will send in a special tessage approving and advising the adoption of Scoretary Windom's silver plan. It lill be a membered that the president referred to this plan in his message in a brief and approximately was only indicating that

nd noncommittal way only, indicating that confight have something more to commutant on the subject at a later day. It is ow supposed that he has been guietly hadying the question in all its bearings and it ready to indorse the scoredary's peconandations. A Washington disputch to a sper, which is feldom far out of the way in alors which is seldom far out of the way in alors which is seldom far out of the way in alors which is seldom far out of the way in alors which is seldom far out of the way in alors with since the plan has been before the highlighter alors with leading members of the epublicant party in both houses of congress, and its with conservative representatives of the apposition, and with the exception of a few pposition, and with the exception of a few, who believe in nothing but the tree and unlikited coinage of silver, Mr. Windom's din has been very cordinly indersed.

loth the president and Mt. Windom have tota the president and are mindom have seeigh thousands of letters from functed ten in all parts of the country, comriseding the proposition and they have been furtished with thousands of newspaper companies. caned with thousands of newspaper com-nients which have also been generally favor-life. Every letter and the sepular chipping his been carefully studied, and all the sug-restions and objections of importance that

have been presented have been carefully noted for future study and reflection. No proposition emanating from the treasury for many years has received so much atten-PORTLAND, THUESDAY, JAN. 2.

It is suggested that the president will improve the opportunity of writing with all this matter before him to answer the objections which have been made to the plan in detail and so present his recommendations to Congress in a more complete, and logical way than he could have done at the time his message was sent to Congress. It is the more important that this should be done because the friends of the plan insist that the most serious chierticals that the should be done because the friends of the plan insist that the most serious chierticals to the serious chierticals. serious opjections to it are based up misconception of its provisions, notably that misconception of its provisions, ustably use giving the secretary power to suspend the purchase of bulkon. This has been severe y criticised by persons who apparently do not understand that it is only an emergency power, to be used when the existence of a combination to bull silver is notorious. An explanation in a special message from the resident would proposely reasons them. president would propably reassure In the mean time Secretary Windom is now at work upon a bill to carry his plan into elfact, which he will get some friend to intro-duce after the reception of the president's message. So it is probable that the silver question will be pretty thoroughly before congress before the end of the present

Katurally the proposition to make the duty on wool ad valorem instead of specific, attracts a tention from writers who know how almost universally ad valorem duties have been made the medium of frauds upon the custom bouses. A writer in the American Book Reporter is of the belief that the change would force the honest importers or manufacturers out of the business, and throw the itrade which they now hold into the hands of those who have no hesitation in swindling the government when the change is offered them, and hases his opinion on a knowledge of the trade gathered from years of experience in buying Austra-tian wools at the regular sales in London. He says there is not a single of valorem duty on he whole tariff list considerable nough te made frank profitable, which is not evaded by mixing and undervaluation, and is contineed from experience with this form of dittes on yarns and goods that an ad valorem duty on wool would not be an exception. His points out the difficulty of determining the price of wool at the custom house, even by an except in order to deter this further an extent in order to determine the by an expert, in order to detect talse invoices. He says the values of foreign wool as determined by the auction sales could not be depended upon, for the reason that lots would be made up by mixing and repacking, if for no other purpose, in order to pass through under a lower range of duties. Quotations made each week by leading deal-ers might be authoritative so far as the dealers were concerned, but it would be exceed-ingly difficult to fit them to the importations with which the customs authorities had to deal. Even if it were possible to place experts at the principal custom houses to prevent undervaluations, there is not expert knowledge enough in the country to equip all the custom houses, and importers would soon discover the places where lalse invoices could be sent in with impunity. The whole experience of the customs service with a velocian delies dispedits them and argues against their adoption. The movement for them is a disguised attempt to admit wool

Congressman Haugen of Wisconsin, a member of the committee on elections, has prepared the draft of a bill relating to elections to the federal house of representatives. similar to that credited to Henry Cabot Lodge, but apparently more carefully worked out. Mr. Haugen seeks by his pro-posed hill to decide in the federal courts of the district in or near where the election is held, by one process of examining witnesses, who has been elected when a contest is begun over the election of representatives in congress. This is to do away, as much as possible, with the necessity of the house looking into and deciding a contested election case, going into all the preliminary details of taking evidence on the ground and summoning witnesses at great expense to Washington. The bill provides that proceedings in the contest in the house shall go on as before, the inquiry and decision in the federal court in the state in which the elec-tion is held being merely to establish in gvery case where a seat is contested by the best means obtainable who is prima facie enlithed to the seat and it. entitled to the seat, and the person in whose layer the court decides shall take the seat and vote on the organization and hold the seat as a nember of the house unless the louse shall reverse the findings of the court and seat the other party to the contest. The bill makes the finding of the effect of district court in which the contest is first examined into, prima facie evidence of the right of the person in whose favor the judge decices to a right to the seat contested, and until the findings of this court shall be presented to the house, no name shall be placed upon the rolls of membership as en-titled to the certificate of membership in the house. This provision is intended to stop the seating of members on certificates made out by governors and secretaries of siste or which certificates a member takes a sent and votes upon the organization of the house and continues to act as a member of the body until by decision of the house on the context to is unseated.

The strained relations between Speaker Reed and Mr. Cheadle, of Indiana, are attracting wile attention. Mr. Cheadle is one of the republicans who voted for the blind preacher, Milburn, for chaplain of the house, against the republican caucus nomi-nee. There was no politics in the vote. Several republicans liked Dr. Milburn of his short players, and 255 26,989 03 41 Chendle in lerculture. 193 31,509 25

__Tp.al... so voted for him. Mr. hame does not appear on any corrmittee, and the story is that Speaker Reed singled him out for punishment for his act of independence in voting for Milburn. This would be more like the pugnacious and vindictive Tom Reed of a few years ago, than the more sagacious and genial person of the speakership canvass. Reed's friends hint that. Cheadle asked for some assignment which Mr. Reed could no some assignment in that he made it a sine qua non-rive him, and that he made it a sine qua non-Really this is more probable. The most ab-sard story current is that the speaker ig-rored Chendle because he is a personal friend of the president. Some anonymous person, interviewed by a Washington cor-respondent, puts it is this shape:

respondent, puts it in this shape:
There is a report of a slightly strained feeling be ween the spenker and the president. Mr.;
Chemic and Mr. Owen and personally on better tenas sith the president illum, perhaps any other members: if their delegation. The speaker's knowledge of that fact, would not raise Mr., Cileade in his esteem a great wey, I fancy.

This credits Speaker Reed with more boyich fo ly and spite than he ever showed in the days when his temperwas under the the days when his temperawas under the weakest control. It is quite as well not to take too; in any of these stories until Mr. Cheadle opens his mouth and declares his intersion to leave the party. When he does that he will probably explain his reasons himself.

Mrs. Larrison and Mrs. Blaine have each spife ed recent bereavement in the loss of a sister. The demands of position are inexorn the case of the former, and she will occurs her place as bostess of the White bound for place as bostess of the White bouss just as if there were no such thing as family shrrow in the world. Mrs. Blaine, not so siverely pressed, will delegate some-of her sicial duties to her daughters and ignore others for the season. Perhaps the nore others for the season. Fernaps the most notable instance where public duty was subordinated to private grief was with messed in the action of Queen Victoria, who for years after the death of the prince con-

sort unterly refused to appear in any public capacity which her position communded. Her subjects, loyal and affectionate, had great subjects, toyat and aneconauc, and great patience with her majesty, but her perpetual weeds and rigid seclusion finally told upon the temper of the best of them, and she was at length compelled to recognize the fact that the living were entitled to some consid-eration. There is no doubt but her hold from the affection of her subjects was upon the affection of her subjects was severely strained, if not in a degree weakened, by her morbid moping over her do-mestic loss. The public, indeed even one's nwn family, grow weary of a constant plaint of wee over a personal gricf. In common parlance, it comes to be "an old story," and the person bereit, however craelly by death. seeks in vain, beyond a natural and reason-able point, for sympathy in his loss. There is nothing, more true, either in poetry or fact, than the declaration that "every heart best knoweth its own loss," and grief never assumes a more mistaken attitude than when striving to impress the public with the presumption of its exceeding bitterness in exceptional cases.

The ceremonies connected with the Lurial d Robert Browning at Westminster Abbey were of memorable character. Royalty lentits presence to the occasion, and workers and patrons of literature stood by reverently uncovered, while the remains of the poet were consigned to companionship with the dust of Milton, Spencer, Chaucer, Gray, and others renowned in the world of English letters. There is a chance that the remains of Elizabeth Barrett Browning will be re-moved from their resting place in Florence and placed in the historic poet's corner in the old Abbey. Curiously enough however, there comes with this announcement a complaint from practical people, who thace sanitary considerations above those of senti-ment, declaring that every new burial in the Abbey adds to the danger of the living and is contrary to the intelligent laws of public hygiene. There is probably something in this, but it is not likely that this view will prevail against the sentiment that endorses the mingling of the kindred dust of reulus.

Each member of the Walton family seems determined to contribute his or her share to the notoriety that has attached to the name. The father and oldest daughter are boarding at the expense of the city, white the mother and the oldest son are keeping things warm at home. Stove-wood is a legitimate element in this process, but the young hopeful, in imitation of his amiable sire, mistook the proper application of this useful and necessary adjunct of domestic comfort, and used it to coerce his mother, instead of to boil the family porifice and diffuse a cheerful warmth in the sliting-room. His mistake cost him \$20 and gave him a chance to add luster to the family name. The case is one wherein the parents having eaten sour grapes, the shildren's testh are set on edge. Irresponsible and vicious parentage bear similar fruit the

And still la grippe causes the arisiocracy of two hemispheres to sneeze and the plain common people to blow their noses and eyes and look savage and sympa thetic by turns. No one has any special spite at Surgeon-General Hamilton and if the prevailing disease were chelera, yellow fever or smallpox all would hope to see the eminent surgeon escape it. Since this "nothing but a bad cold aggravated by a lively imagina-tion," however, some hundreds of people, who are groaning with pains in the luins, and miserably striving to staunch the flow of hot water from their swotlen eyelids and exceriated nostrils while the probability of pneumonia adds to their depression of spirits are wishing for the surgeon general to take his turn at it. Competent sestimony declares that there is nothing like la grippe to take the conceit out of a man.

East Portland seems to be in earnest on the sewage question. It is a notorlous fact -since he who runs may read-that there are some of the vilest filth boles to that city that ever offended the nostrils and menaced the health of the people of a muricipality, It is certainly true that sanitary engineering and common sense should combine to dispose or the fifth of the second city in the state so that it may no longer be literally a stench in the nostrils of decency.

TWO-ACRE TRACTS IN ASTORIA

TWO-ACRE TRACTS IN ASTORIA

In Astona we can sell you two-acre blocks near the motor line for \$250 per acre. Each block makes 22 lets. Also city lofs in Albany and farming lands in the surrounding country. These cities are all growing and prosperous.

Salem has had 17 new brick stores, put. up inside of one year, five miles of street railway, built and put in operation, and two males more of electric street railway is process of construction.

Astoria is destined to be the greatest seaport on the Pacific Coast, and lote now selling for one hundred dollars will bring one thousand dollars in one year.

TWO-ACRE TRACTS IN ASTORIA

TWO-ACRE, TRACTS IN ASTORIA

To those who suffer from poor tenements, high rents, crowded streets, there are a few facts worth considering in connection with beautiful West Portland You avoid city tax and water tax, and get your fuel at one half cost You get good pure water and live above the malaria belt. Your payment on your lot and house each month will not amount to what your rent does now You are simply purchasing your home by paying your rent, you will have enough vacant room on your lot for a kitchen garden, you can keep chickens and a cow, if you see fit to do so, you will not be compelled to live on the second or third floor, and let your wife wreck he constitution climbing up and down two or three pair of stairs. In comparison, you are no farther from West Portland Park, with a motor road, than from Twenty first street to the bridge by street car, while it will be a much more comfortuble way of traveling, with less time and only 5 cents fars. West Portland Park is within what must be the limits of the city of Portland in the near future. There are no high hills to scale, no rivers with their draw bridge hinderances to pass in reaching the Park. When there you do not have to keep your eve on it in feir of a changing surface from shifting sand, or impassable from marshy bottom, or lifficult of gaide and cultivation from ledges and rocks A BEAUTIFUL, PERTILE, DRY HEALFHY TABLE LAND These lots can be purchased on the ans allment plan, or by puring cash for a lot a cottage will be put upon 1t, 11 desired, and payed for by monthly payments less than the rent of the same tenement would be in the city. The owners and manager of this beautiful residence spot intend to make it the choice suburb of the city of Portland

=VEST

A rich, beautiful tract of table land seven hundred (700) feet above the Willamette. Beautiful Parks, with mineral springs, shade trees and macadamized walks. A building society in operation trees and macadamized walks. A building society in operation erecting cottages and stores for rent or sale. A motor line is being constructed, to be in operation by May next, with 5c fare. Only 500 of the 3700 of these lots are placed on the market at a quarter of their value. These lots are sold on the instalment plan, with easy payments, or a liberal discount for cash. A special arrangement will be made with parties purchasing one

A carriage will be in waiting with intelligent and gentlemanly salesmen to show parties these lots, the work being done by the builders' association and the motor line.

E. ALLEN SHOREY

Agent for West Portland Park Association,

OFFICE, - - - ABINGTON BUILDING, - - - ROOM 13

It is perfectly safe to predict with the rapid growth of Portland, and the marked advantages West Portland Park has by reason of its location, motor line and Builders' Association, lots there will be worth five hundred (\$500) to a thousand dollars (\$1000) within the next year Portland is by all odds the leading sand couars (\$1000) within the next year Portland is by all odds the leading city of the great and prosperous Pacific Northwest; if is the great money center; it is the great wholesale lobbing center, it is the great manufacturing center, and while it does not blow as many boom trumpets, or blow them as long on the cities, yet in its increase of wealth, population, and business, it advances other cities, yet in its increase of weath, population, and business, a variance overy year more than the combined growth of all the cities of the Pacific Northwest. In the last year the valuation of Portland increased nearly cloven million dollars (\$11,000,000), while within the last time months, the building and improvements has reached the marvelous burn of cleven million dollars (\$11,000,000). No better judges of places for investment are known than railroad men; and it speaks with emphasis for Portland real estate when it is known that within the last six months more than four railion dollars (\$4,000,000) fave been invested by them in real estate in and around the city of Port and. West Portland Park is one of the most beautiful and healthy locations around Portland. It is safe to say that such an opportunity as West Portland Park offers to investors of moderate means who are seeking a safe and prof table investment has never been known th all the great opportunities of the Northwest The civil engineer who surthe in the tract of land (and he is one of the best in the city) says it is the most desirable tract of land for residences he has ever surveyed

A RARE OPPORTUNITY.

SITO land it is their firm belief that these blocks that thew now offer for SITO will be worth at least \$2000 within two years. They also belief one-half blocks of eight lots for \$90-\$25 down and \$10 a month. The property, referred to is but 100 rods from the river, and there is a petition now before the city-council, of Astoria, asking for an appropriation with which to build a bridge over Young's fiver. There is no doubt, but that this bridge will be built, and it a point directly opposite this addition. There is to be a great safe of ots comortow by the Astoria Improvement and Investment Company. The \$10 lots in this addition are said for he very chang at present prices, and are affording an excellent opportunity for investment. They per cant, off is allowed when an entire block is bought. This property if guaranteed to be high, level land and bountifully situated, communiting country. There is, moreover, plenty of fine sarring water on this property. Astoria is well known as a prospective stapping point of no little importance, and people are commencing. To appreciate the great matural advantages of the place. The Astoria Improvement & Investment Company desire to state that purities investing now and attheir price for the next thirty day are sure to realize handsome profits. This company change nothing for deep and gatarantee perfect lities. They are now differing the cheppest acreage, residence and business property in Astoria. Their office is bank; Portland. The Supposed Drowning Is Still Involved in Mystery.

Series of Scolal Entertainments-Bad Piece of Road-A Watch-Night Party-Enjoyeble Programme-Notes.

The mystery surrounding the supposed drowning Christmas morning from the old steamer Wonder, moored near the Willemette shipyard, becomes more involved than ever. Doc Reed, who reopé the notion stand near by, and who heard the cry for help, stated yesterday that two men instead of one had been sleeping on the Wonder prior to Christmas eve, this fact having the New Pears reservined. "One of these men

WATCH NIGHT PARTY.

Complaint is made that a family in Tibbett's as dition is allowing above to the antiage at aight, much to the aunoyance of the people in that neighborhood. The animal is kept up during the day, but at night is furned out, and then she makes herself very numerous, opening gates, campiling on flower heals, and committeing other depredations. See is consigned to the tender merics of the poundranster, who can flut gue effective method of checking her nocturnal wanderings.

In getting the heavy limbers and lumber to the new sawnill; now being constructed on Clinton & McCoy's grounds, a great deal of trouble is being experienced. The wagnes, with their heavy-loads of imbor, so out Fifth etreet and serves Standons bridge to Inckson street, where it is more sary to cross the open field for alont 200 yierds. The ground is so very soft that the wheels sink down to the light in places, causing delay and trouble.
